

PSHE

What is PSHE?

Personal, Social, Health and Economic education

This term we want to find
out...

Are we all the
same?

Today we are finding out...

What is the same and
what is different
between me and my
friends?

Talk with the person next to you.

What similarities do you share?

What differences do you have?

TTYP: What do you know about boys and girls?

In groups, read each statement carefully.

Do you agree or disagree?

Some people say...	Are they right?	Are they wrong?
only boys are good at football		
girls and boys should wear different clothes		
only girls cry		
girls always like the colour pink		
males and females have different bodies		
boys always run faster than girls		
only boys like cars		
only girls like cuddles		
girls and boys can both be brave		

Boys and Girls

Lots of things about boys and girls are the same, but some things are different.

Let's think about our bodies.
Play Simon says touch your...head!

Can you name all of the parts of your body?

Boys and Girls

Most of our body parts are the same whether we are a boy or a girl. Which body parts are the same on these babies?

Boys and Girls

Can you tell which is a girl (female) and which is a boy (male)?

Boys and Girls

Most of our body parts are the same whether we are a boy or a girl, but some parts are different. These are our **Private** parts.

Sometimes we give silly names to these parts of our bodies when we talk about them.

Do you know the **proper names** for your private parts?

Use baby dolls to show and name these parts (next slide).

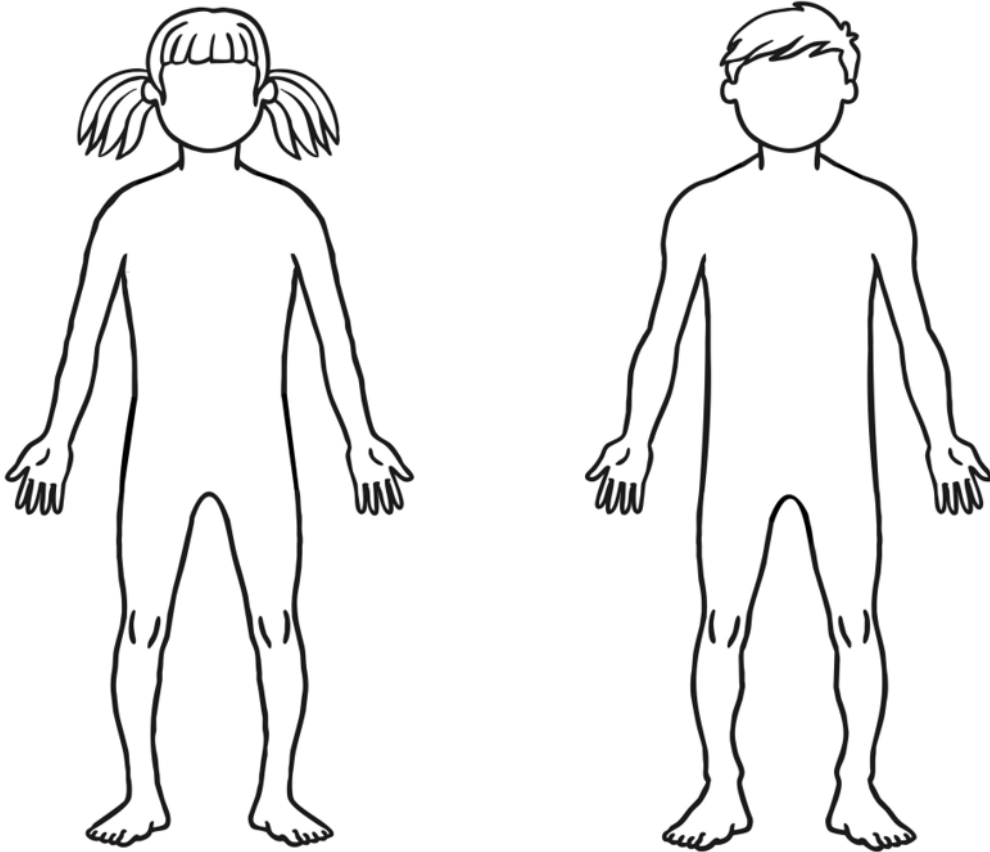

These are the **genitals**. Midwives or doctors look at these to say whether the baby is male (boy) or female (girl).

Now it's your turn!

In groups of 4, stick the labels onto the correct parts of the bodies.

hands	head	vagina
arms	shoulders	vulva
legs	knees	ears
feet	toes	testicles
ankle	fingers	penis
eyes	tummy	chest
elbows	bottom	back
neck	wrist	mouth
teeth	hair	face
